

How Aspen's Products Work

The Combustion Process:

- Fuel molecules naturally cluster together, which leads to uneven combustion and deposits of residual carbon in engines
- A cut of crude oil is mixed with oxygen and proprietary catalysts in a reactor
- The molecules become polarized
- Aspen Fuel Enhancers® shorten the combustion event and eliminate coarse deposits
- This results in more complete combustion, reduces energy consumption, increases mileage and reduces pollutant emissions
- Aspen's patented fuel enhancing products contain a polarizing agent, di-ethylene glycol monobutyl ether, which reduces fuel molecule clusters
- Aspen Fuel Enhancer products will permit a cleaner-burning engine and also reduce corrosion in storage tanks

What is the Satisfaction Guarantee?

Aspen stands behind the quality of its products and guarantees consumer satisfaction. If for any reason Aspen products do not perform as advertised, please contact Aspen within 60 days of purchase for a full refund of the product price and applicable tax.

Fuel Enhancers

Introduction

Aspen Environmental Services, Ltd. manufactures and markets superior fuel enhancing products which boost mileage performance and reduce the carbon footprint for gasoline and diesel engines.

Aspen products:

- Reduce fuel consumption by as much as 10%
- Reduce hydrocarbon and carbon monoxide emissions and other greenhouse gasses by as much as 10%
- Help save fuel and the environment

In the past three years, diesel and gasoline prices have increased 200%

Aspen Gold Fuel Enhancer® Significantly Improves Mileage

Aspen Gold Fuel Enhancer® (AGFE) is targeted to gasoline fleets and individual consumers.

- One gallon of Aspen Gold Fuel Enhancer® will treat 5000 gallons of gasoline
- Improves mileage for gasoline engines by up to 20% or more
- One 16-ounce bottle of Aspen Gold treats 256 gallons of gasoline
- Aspen Gold Fuel Enhancer® costs approximately 3 cents a gallon
- Aspen Gold Fuel Enhancer® testimonial letters available upon request

Aspen Total Fuel Enhancer® Significantly Improves Mileage

Aspen Total Fuel Enhancer® (AGFE) is targeted to diesel fleets and individual consumers.

- One gallon of Aspen Total Fuel Enhancer® will treat 3000 gallons of diesel fuel
- Improves mileage for diesel engines by up to 10% or more
- One 16-ounce bottle of Aspen Total treats 375 gallons of diesel fuel
- Aspen Total Fuel Enhancer® costs approximately 4 cents a gallon
- Aspen Total Fuel Enhancer® testimonial letters available upon request

Aspen Gold Fuel Enhancer® Effectiveness Proven in Gasoline

- Formulation increases regular fuel octane to perform like premium fuel octane
- Economical – costs less per treated gallon than competitive products
- One ounce of Aspen Gold treats 16 gallons of gasoline
- Approved by U.S. EPA and acceptable for all bulk fuel storage applications
- Contains no metallic compounds

**Aspen Enhancer products
will not void engine warranties**
